Who it is built for

Built for hospitality properties that need a clear front-desk workflow without enterprise complexity.

Hotels

Reservations, rooms, guests, folios and billing.

Lodges

Quick check-in, identity records and dues.

Guest Houses

Availability, services and stay history.

Homestays

Simple booking and property operations.

Core modules

Front desk, room status, service posting and payment settlement stay synchronized.

Room & Rate Master

Room types, occupancy, tariffs, plans and taxes.

Reservation

Availability, booking, arrival and cancellation records.

Guest Check-in

Identity, companions, stay details and guest history.

Folio & Billing

Room rent, services, restaurant posting, payments and GST invoice.

Housekeeping

Room cleaning, maintenance and readiness status.

Occupancy & Revenue

Daily room position, revenue, dues and source analysis.

Connected workflow

A room moves through a clear status from availability to checkout.

Atithi keeps booking, guest, housekeeping and billing updates aligned.

Step 1: Reserve

Check availability and capture booking details.

Step 2: Check In

Record guest identity and assign room.

Step 3: Post Services

Add room rent and service charges to folio.

Step 4: Check Out

Settle dues, issue invoice and release room.

Give front-desk staff a clear view of every room and guest obligation.

The system organizes hospitality operations around room status and guest folios.

- Live room availability and occupancy
- Reservation and cancellation history
- Guest identity and stay records
- Room and service folio posting
- Housekeeping and maintenance status
- GST billing and due payment tracking

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
