Who it is built for

Designed for battery retailers, distributors and service businesses where serial and warranty history matter.

Battery Retailers

Serial-wise sale, exchange, warranty and billing.

Distributors

Brand, model, batch and dealer stock control.

Auto Service Centres

Vehicle and customer service history.

Inverter Dealers

Battery, inverter, warranty and installation records.

Core modules

Serial numbers create a complete trace from inward stock through service events.

Serial-wise Stock

Purchase, inward, current owner and sale traceability.

Billing & Exchange

GST billing, old battery exchange and payment handling.

Warranty & Claims

Warranty period, complaint, claim and replacement records.

Vehicle CRM

Customer, vehicle, installation and service history.

Reminders

Warranty, service and follow-up reminders.

Brand & Service MIS

Stock, claim, replacement and brand performance reports.

Connected workflow

A complete serial history across sale, service and replacement.

Staff can retrieve the original transaction and warranty context when a customer returns.

Step 1: Receive

Record brand, model and serial at purchase.

Step 2: Sell

Link serial to customer, vehicle and warranty.

Step 3: Service

Record complaint, inspection and claim status.

Step 4: Replace

Post replacement while retaining original history.

Reduce warranty confusion and improve customer service response.

Serial-level records replace manual warranty cards and scattered service notes.

- Serial-wise stock and ownership trace
- Warranty start and expiry records
- Replacement linked to original sale
- Vehicle and customer history
- Old battery exchange handling
- Brand-wise claim and service analysis

Search and evaluation guide

Battery dealer software for serial numbers, warranty and replacements

Battery ERP is built around the serial-number and warranty lifecycle of automotive and inverter batteries. Dealers can connect purchase, sale, customer vehicle, service history, warranty claims and replacement activity instead of maintaining separate registers.

Common solution searches: Battery dealer software | Battery warranty software | Serial number inventory software | Battery billing software India | Battery replacement tracking | Battery shop ERP

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
