Who it is built for

Designed for diagnostic businesses that need quick billing and controlled report delivery.

Pathology Labs

Patient, billing, sample, result and report workflow.

Diagnostic Centres

Multi-department test catalogues and report formats.

Collection Centres

Centre-wise receipts, samples, reports and settlements.

Lab Networks

Central masters with branch and doctor analysis.

Core modules

Diagnify organizes clinical workflow status while preserving billing and referral information.

Patient Registration

Patient demographics, history, referral and visit details.

Billing & Packages

Tests, panels, packages, discounts, receipts and dues.

Sample Tracking

Collection, accession, status, pending work and rejection notes.

Result & Verification

Parameter entry, reference ranges, comments and authorization.

Report Delivery

PDF output, QR-ready verification and WhatsApp/email sharing.

Doctor & Centre MIS

Referral, collection centre, revenue and pending report analysis.

Connected workflow

A status-driven process reduces missed samples and delayed reports.

Every visit moves through clearly defined stages with operational visibility.

Step 1: Register & Bill

Select tests, collect payment and create the visit.

Step 2: Collect & Track

Record samples and monitor pending processing.

Step 3: Enter & Verify

Capture results, validate ranges and authorize.

Step 4: Deliver & Analyze

Generate reports and review doctor or centre performance.

Improve patient service while maintaining laboratory process control.

Diagnify combines front desk speed with structured sample and reporting stages.

- Quick patient registration and test selection
- Configurable test, panel and package masters
- Sample and report pending visibility
- Parameter-based result formats
- PDF report generation and sharing
- Doctor and collection-centre analysis

Search and evaluation guide

Diagnostic lab software for patient billing, samples and reports

Diagnify connects patient registration, test selection, sample workflow, billing, result entry and report delivery. It is built for pathology and diagnostic centres that need a traceable flow from reception to finalized report.

Common solution searches: Diagnostic lab software India | Pathology lab software | Lab billing software | LIMS for diagnostic labs | Patient report software | Collection centre software

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
