Who it is built for

Suitable for retail businesses that need fast counter operations and accurate item-level inventory.

Garment Stores

Size, colour, style, brand and barcode-driven stock.

Footwear & Fashion

Variant inventory, offers, returns and customer history.

Multi-Store Retail

Central masters, branch control and consolidated reporting.

Specialty Retail

Flexible attributes, pricing, promotions and sales workflows.

Core modules

Each operational entry updates connected stock, customer, supplier and reporting workflows.

POS & GST Billing

Fast barcode scan, discounts, returns, multiple payment modes and customer selection.

Inventory & FIFO

Barcode-wise movement, ageing, godowns, transfers, stock valuation and reconciliation.

Purchase & Catalogue

Supplier purchases, product attributes, price control, barcode generation and label printing.

CRM & Loyalty

Customer history, loyalty rules, coupons, approval memo and targeted engagement.

Accounts & MIS

Cash, bank, receivables, payables, profit views and business reports.

Roles & Controls

Role-based navigation, permissions, approvals and operator accountability.

Connected workflow

From purchase receipt to customer retention-without disconnected registers.

A connected transaction flow improves speed at the counter while preserving auditability in the back office.

Step 1: Purchase & Tag

Receive goods, map attributes and create barcode labels.

Step 2: Stock & Price

Maintain branch stock, pricing, promotions and availability.

Step 3: Sell & Collect

Scan, bill, accept payment and share the invoice.

Step 4: Review & Engage

Track margin, customer behaviour, loyalty and replenishment.

Built for speed at the counter and control at head office.

RetPro is structured around practical retail activities rather than isolated software screens.

- Continuous barcode-focused billing experience
- Accurate size, colour and style-level stock
- Promotion, loyalty and approval-memo workflows
- Branch-wise and consolidated visibility
- Customer invoice sharing and portal-ready flows
- Ledger-linked operational reporting

Search and evaluation guide

Retail ERP and garment billing software built for real store operations

RetPro is designed for retailers searching for barcode billing software, garment shop POS, inventory control, customer loyalty and multi-store reporting in one connected ERP. It supports the operational detail required by fashion, footwear and specialty retail without separating billing from stock accountability.

Common solution searches: Retail ERP software India | Garment shop billing software | Barcode POS software | Retail inventory management | Multi-store retail ERP | Garment POS software

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
