Who it is built for

Suitable for businesses that need structured attendance and salary processing without spreadsheet dependence.

Retail Teams

Shift and branch-based employee attendance.

Factories & Units

Daily attendance, overtime and wage calculations.

Offices

Leave, holidays, payroll and employee documentation.

Multi-Location Businesses

Central policy with location-wise workforce reporting.

Core modules

Each payroll component can be validated before salary is finalized.

Employee Master

Employment details, documents, salary structure and status.

Attendance & Shifts

Punches, shifts, late, half-day, weekly off and corrections.

Leave Management

Leave types, balances, requests, approvals and holidays.

Payroll Processing

Earnings, deductions, overtime, advances and salary calculation.

Payslips & Records

Payslip generation, distribution and salary history.

HR Reports

Attendance summary, payroll registers and employee analysis.

Connected workflow

A controlled payroll cycle from daily presence to final payslip.

Attendance exceptions are reviewed before they become salary errors.

Step 1: Capture

Record attendance, shift and leave information.

Step 2: Review

Resolve late, missing punch, overtime and adjustments.

Step 3: Process

Calculate earnings, deductions, advances and net salary.

Step 4: Publish

Finalize payroll, issue payslips and maintain records.

Reduce repetitive calculations and create an auditable salary process.

StaffPay keeps workforce inputs, policy rules and salary outputs connected.

- Attendance-driven payroll calculations
- Shift, weekly-off and late rules
- Leave balances and approval trail
- Overtime, advance and deduction control
- Employee-wise salary history
- Printable and shareable payslips

Attendance and payroll software for growing Indian teams

StaffPay combines daily attendance, shifts, leave, overtime, salary calculations, advances and payslips so HR and accounts teams can work from the same employee record. The focus is practical payroll processing rather than disconnected attendance registers.

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
