Who it is built for

Best suited to distribution-led manufacturers and businesses operating through godowns and field sales teams.

Manufacturers

Production consumption, output, packing and finished stock.

Distributors

Godown inventory, dispatch, billing, returns and collections.

Field Sales Teams

Trip opening, route billing, stock and settlement accountability.

Head Office

Consolidated stock, cash, performance and exception reporting.

Core modules

VitranPro treats production, transfer, sale, return and collection as one traceable operational chain.

Production Control

BOM, material consumption, process stages, finished output and planning.

Godown Operations

Owner-wise stock, transfer, dispatch, receipt and godown accountability.

Salesman & Trips

Line trips, vehicle stock, route billing, returns and trip settlement.

Distribution Billing

Fast POS billing, schemes, free items, GST, print and payment modes.

Stock Ledgers

Product, pack, market and owner-level movement with reversible posting.

HO MIS & Cash

Sales, stock, collections, expenses, verification and consolidated cash position.

Connected workflow

A traceable movement chain for material, finished goods, sales and money.

Every stage is designed to preserve source ownership and reporting continuity.

Step 1: Plan & Produce

Convert demand into production orders and finished output.

Step 2: Store & Transfer

Move stock between production, godown and salesman owners.

Step 3: Bill & Return

Execute office or trip billing with schemes and reversals.

Step 4: Collect & Verify

Track mode-wise collections, expenses and settlement verification.

Operational visibility across locations, users and stock owners.

VitranPro helps management find the actual source of movement and responsibility behind each balance.

- Production planning linked to market requirements
- Godown and salesman owner-wise stock control
- Trip-based billing and return handling
- Promotion and free-item posting with reversal
- Mode-wise collection verification and cash accountability
- HO dashboards for consolidated operational decisions

Search and evaluation guide

Distribution and manufacturing ERP for production-to-market control

VitranPro is aimed at manufacturers and distributors that need production, godown inventory, field sales, schemes, returns and collection accountability in one chain. It is particularly useful where finished stock moves through multiple owners, branches or salesman trips before settlement.

Common solution searches: Distribution ERP software India | Manufacturing ERP software | Godown stock management | Salesman distribution software | Production planning ERP | FMCG distribution ERP

Frequently asked questions

Can the system be customized for our workflow?

Yes. The implementation can include company-specific masters, approvals, print formats, reports and integrations after requirement mapping.

Can it be used on mobile devices?

The web interfaces are designed to be responsive. Device suitability depends on the module, scanning method and printer integration required.

Is data migration available?

Migration can be planned from spreadsheets or an existing system after checking data quality, mapping rules and reconciliation requirements.

How is implementation handled?

We begin with discovery and process mapping, configure the system, validate with sample data, train users and then move to controlled go-live.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
