

Vakil On Cloud

Run your law office from one secure case-management workspace.

Vakil On Cloud helps advocates organize clients, cases, next hearing dates, fee collections, documents and follow-up tasks without depending on scattered diaries, files and chat history.

Who it is built for

Designed for independent advocates, chambers and small law offices that need a simple, mobile-friendly system for daily case administration.

Independent Advocates

Maintain clients, cases, next dates, documents and fee records from one account.

Law Chambers

Give advocates a shared operational view while keeping case information structured.

Litigation Practices

Track court type, case type, next hearing, history, tasks and supporting documents.

Growing Law Offices

Replace diary-and-spreadsheet processes with searchable, repeatable workflows.

Core modules

The system follows the practical sequence from client onboarding to case activity, hearing follow-up and fee collection.

Clients & Advocates

Create client records, advocate profiles and searchable contact information.

Cases & Court Details

Record court type, case type, case information and case-wise activity.

Next Hearing & Tasks

Track next peshi, hearing history, follow-up work and due tasks.

Fees & Payments

Record agreed fees, receipts, outstanding balances and payment history.

Documents & Camera Uploads

Upload case documents from desktop or mobile, preview them and retain uploaded dates.

WhatsApp Follow-up

Open reminders in WhatsApp on mobile or desktop and record when communication was sent.

Connected workflow

A simple daily flow from client registration to hearing follow-up and payment tracking.

Case information remains connected instead of being split across diaries, folders, spreadsheets and messaging apps.

Step 1: Register Client

Create the client and essential contact details.

Step 2: Open Case

Add court, case type, case details, advocate and supporting documents.

Step 3: Track Peshi

Maintain next hearing, history, tasks and reminders.

Step 4: Collect Fees

Record receipts, view outstanding and follow up when required.

Designed to reduce missed follow-ups and administrative searching.

Vakil On Cloud keeps everyday law-office administration accessible on desktop and mobile so the advocate can focus on case work.

- Client and case records in one searchable system
- Next hearing dates with case history
- Fee receipts and outstanding visibility
- Mobile camera upload for case documents
- Template-based document preparation
- WhatsApp reminder workflow with sent confirmation
- Responsive web access for desktop, tablet and mobile

Search and evaluation guide

Advocate case management software for clients, hearings, fees and documents

Vakil On Cloud is built for advocates searching for a practical case management system, lawyer office software, hearing-date tracker and advocate fee management solution. It combines daily case administration with mobile access and communication workflows suited to Indian legal practice.

Common solution searches: Advocate software India | Lawyer case management software | Law office management software | Next hearing reminder software | Advocate fee management | Court case management software

Frequently asked questions

What can an advocate manage in Vakil On Cloud?

Clients, cases, court and case types, next hearing dates, hearing history, tasks, fees, payments, documents and communication follow-up can be maintained in one system.

Can I use it on a mobile phone?

Yes. The web interface is designed to work on desktop, tablet and mobile browsers, and document uploads on mobile can use the device camera where supported.

Can the system track next hearing or peshi dates?

Yes. Each case can maintain the next hearing date together with prior hearing history and related follow-up tasks.

Can I record advocate fees and outstanding amounts?

Yes. Fee and payment records can be maintained so the office can review receipts and pending amounts for follow-up.

Does it support WhatsApp reminders?

The workflow can open the prepared reminder in WhatsApp on supported devices and record the sent confirmation for office tracking.

Can existing case data be migrated?

Migration can be planned from spreadsheets or other structured sources after reviewing available fields, data quality and document-mapping requirements.

Next step

Share your current workflow, users, locations, devices, print requirements and reporting priorities. Alltrim Solutions can then demonstrate the relevant product flow and identify configuration, migration and integration requirements.
